Yilin Wang | Dylan-Wyl10 | 0000-0002-6002-0535

West Lafayette, IN - 47906, USA | Full CV: dylan-wyl10.github.io/cv

Research Interests

Seeking **Research Scientist / Applied Scientist / ML Engineer** roles in intelligent transportation systems and autonomous driving:

- **Robotaxi & AV fleet operations** – routing, dispatching, and repositioning at network scale, with fleets doubling as mobile sensing platforms; via MILP and learning-based combinatorial optimization.
- **LLM/VLM agents & world models for AV & physical AI** – mobility planning foundation models for sim agents, world-model construction, and safety-critical scenario generation & closed-loop validation.
- **Cooperative perception & V2X systems** – from algorithms to real-world field deployment.
- **Agentic system implementation & deployment** – multi-agent architectures, tool orchestration, and agent evaluation for production workflows, from smart-city & robotaxi operations to automated research pipelines.

Education

- **Purdue University** *Aug.2021 - May 2027 (Expected)*
  Doctor of Philosophy in Civil Engineering (Transportation and Infrastructure Systems Engineering) West Lafayette, US
  - Research Area: CAVs, Cooperative Perception, Physics-informed ML, Robotaxi Operations; GPA: 3.8/4.00
- **Carnegie Mellon University** *Aug.2019 - Dec.2020*
  Master of Science in Advanced Infrastructure Systems Pittsburgh, US
  - Area: Smart City, Deep Learning, Natural Language Processing; GPA: 3.87/4.00
- **Tongji University** *Aug.2015 - Jun.2019*
  Bachelor of Science in Civil Engineering (Geo-technical and Underground Engineering) Shanghai, China

Working Experience

- **Inchor(SaferDrive AI)** *Dec.2025 - Jun.2026*
  Simulation Development Engineer Intern Ann Arbor, MI
  - **TeraSim – Naturalistic Driving Behavior** [Details]
    - Developed and maintained TeraSim, an open-source city-scale traffic simulation platform for AV safety testing; led integration of MotionTransformer as the foundation model of NNDE for city-scale naturalistic driving.
    - Led the joint project with NVIDIA and the City of San Jose: a city-scale NVIDIA Metropolis Blueprint demo ("City Operations Agent" and digital twin), **selected for NVIDIA CEO Jensen Huang's GTC 2026 keynote**.
  - **AgentSim – Agentic Synthetic Scenario Generation** [Demo]
    - Provide an end-to-end pipeline: from trajectory/text description to safety-critical scenarios with ego camera-view data.
    - Develop an agentic platform with LLMs/VLM agents to collaborate, reconstruct, mutate, and render driving scenarios.

Projects

- **Cooperative Perception CAV Fleet Operation for Data Collection** *Apr.2023 - Jun.2026*
  Individual Research Project, Purdue University | Funded by NSF and USDOT (CCAT) [Details]
  - **RoboSense** *(Sept.2024 - Jun.2026)*: rolling-horizon MILP that routes robotaxis for both travel time and network monitoring coverage; under revision at *Transportation Research: Part C* [S.1], INFORMS 2026 talk [C.1], TRB 2026 poster [C.2].
  - **Dynamic Routing of CAVs for Improving Network Coverage** *(Apr.2023 - Aug.2024)*: multi-objective CAV routing with network coverage as one objective, solved by greedy heuristics in SUMO; TRB 2024 poster [C.3].
- **Modeling Car-Following Behavior with Physics-Informed Neural Network** *Jan.2022 - Present*
  Behavior-level reconstruction of human driving: from physics-constrained prediction to cognitively interpretable response [Details]
  - **IDM-Follower** *(Jan.2022 - Feb.2024; supported by USDOT FHWA)*: physics-informed neural network that integrates the Intelligent Driver Model, robust to real-time GPS noise; *IEEE Transactions on Intelligent Vehicles* (first author) [J.2], presented at IEEE IV 2024.
  - **Neural Force** *(2024 - Present)*: interpretable learned car-following response fields, compared across four naturalistic driving datasets; manuscript in preparation (co-author).
- **Cooperative Driving Automation System for Urban Areas (MMITSS)** *Sept.2021 - Jun.2026*
  Multiple Projects, Funded by USDOT FHWA, Michigan DOT (via WSP), and Leidos Inc. [Details]

- **Smart Intersections: Paving the Way for a National CAV Deployment** *(USDOT FHWA; Lead Developer and Researcher; Oct.2023 - Jun.2026)*: redeveloped MMITSS, an open-source V2X signal priority system (SAE J2735), and built its deployments at Mcity and on Ann Arbor's Ellsworth Road corridor, where transit signal priority has served Route 6 buses since August 2025.
- **Development of Transit Signal Priority and EV Preemption for the Intelligent Woodward Corridor Project** *(WSP, for Michigan DOT's ATCMTD project on M-1; Mentor and Developer; Jan.2024 - Jun.2026)*: implemented MMITSS for the Detroit QLine streetcar and extended it to the NTCIP 1211 operation protocol.
- **Integration CDASim with MMITSS and Performance Analysis** *(Leidos, for USDOT FHWA's CARMA program; Developer; Sept.2024 - Apr.2025)*: integrated MMITSS into CARMA-CARLA-SUMO co-simulation; 12 pull requests merged into three FHWA repositories.
- **Signal V2X-Based Versatile Connected Autonomous Vehicle** *(Core Team Member; 2024 Mcity 2.0 Challenge)*: connected the signal controller to the roadside V2X unit, and developed and deployed a signal-aware speed advisory algorithm on a real vehicle.

- **Safety Instinct for Physical AI: A CBF-Based Safety Cerebellum for Quadruped Robots** *Feb.2026 - Apr.2026*
  Independent Research | Internship | SaferDrive AI(Inchor) [Details]
  - RL waypoint controller for a Boston Dynamics Spot robot in NVIDIA Isaac Sim, layered with a Control Barrier Function safety filter that keeps a dynamic safety boundary around moving obstacles.

Technical Demonstrations

- **IEEE IV 2026** (Mcity): MMITSS transit signal priority demo for symposium attendees and USDOT officials. Jun.2026
- **ITS America 2026** (Detroit, MI): MMITSS phase-2 demo for Michigan DOT and other state DOT officials. Jun.2026
- **UMTRI 60th Anniversary Symposium** (Mcity): live V2X transit signal priority demo with a transit bus. Oct.2025

Skills

- **Programming & ML**: Python, C++, MATLAB, JavaScript; PyTorch, CUDA, Hugging Face
- **Simulation & Optimization**: SUMO, CARLA, CARMA, NVIDIA Isaac Sim, Gurobi
- **Systems & Tools**: Linux, Docker, Conda, AWS, SSH; GitHub, Jira, Slack; Microsoft Office, Auto-CAD, ArcGIS

Honors and Awards

- **Honorable Mention**, Mathematical Contest in Modeling of USA, 2018
- **Silver Award** (team leader), China College Students' "Internet+" Innovation and Entrepreneurship Competition, 2018

Additional Information

Languages: English (Proficiency), Chinese Mandarin (Native) | **Interests**: Soccer, Skateboarding, Range and Gaming
